

**POSITION: ENGINEERING TEAM LEADER**  
**LOCATION: COQUITLAM, BC**

Corix Water Systems designs and builds water and wastewater treatment systems for municipal and industrial applications as well as true pre-assembled, pre-tested packaged water distribution systems. We also supply a wide range of process equipment, control and electrical systems. We offer a flexible response to delivering the project, ranging from equipment supply to full design, build, operate and maintain solutions.

Corix Water Systems has an immediate career opportunity in our Coquitlam office for an Engineering Team Leader who will provide leadership to the Engineered Systems technical group to ensure that a full continuum of services is created and structured in response to customer needs. This position will work to ensure that standardized processes and procedures are developed for the sale and design of all engineered systems. The fit into the Company culture will be one of the most important deciding factors. .

### **Core Responsibilities**

- Ownership of all Engineered Systems product line design
- Development of Engineered Systems design and manufacturing best practices
- Development of standardized designs for packaged pump, blower and valve systems
- Providing leadership to the Engineered Systems design team of CAD designers
- Development and modification of current designs for manufacturing efficiency
- Development of a relationship with sales group to ensure the Engineered Systems technical group is able to support for ongoing tendered equipment business'
- Provide engineering leadership to all CWS manufacturing processes for Engineered Systems

### **Knowledge, Skills and Abilities**

- Flexibility in work assignments
- Self-motivated
- Exceptional oral and written skills
- Proficiency with MS Word, Excel, Project, PowerPoint and other related software
- Ability to develop creative approaches to problems, effectively communicate with both internal and external customers and effectively facilitate internal/external presentations
- Team orientation
- Experience in the preparation and review of Requests for Proposals and Project Change Notices
- Experience with financial controls and contract administration
- Demonstrated analytical skills, written and oral communication skills
- Demonstrated ability to lead and manage a technical design team
- Fully conversant with procedures used by architects, engineers, contractors, and construction testing and inspection companies.
- Result-focused, customer-centric and self-motivated individual
- Excellent communication and interpersonal skills are a must. This includes the ability to present to clients and other applicable stakeholders
- Ability to act independently, decisively and quickly under pressure.

### Minimum Qualifications

- Bachelor Degree in Mechanical or Civil Engineering from an accredited university
- Registration or eligibility to become registered as a Professional Engineer in the Province of British Columbia
