Water Systems  
Utilities

**POSITION: INSTRUMENTATION TECHNICIAN**  
**LOCATION: LANGLEY, BC**

**Summary:**

Corix Water Systems designs and builds water and wastewater treatment systems for municipal and industrial applications as well as true pre-assembled, pre-tested packaged water distribution systems. We also supply a wide range of process equipment, control and electrical systems. We offer a flexible response to delivering the project, ranging from equipment supply to full design, build, operate and maintain solutions.

Corix Water Systems has an immediate career opportunity for an Instrumentation Technician based in our Langley office. If you are a person who is able to navigate through any challenge and are looking for a career with a dynamic growth oriented organization that rewards results, this is the position for you.

**Core Responsibilities**

- Control panel design to include PLC and HMI programming and configuration
- Start up and commissioning of control panel for water treatment and waste water applications
- Provide service support of control systems to end users

**Qualifications**

- Diploma of Technology in Automation and Instrumentation
- Proficient in PLC control design and programming
- Positive work attitude
- Relevant experience in water treatment and wastewater treatment will be advantageous
- Strong interpersonal and communication skills
- Superior organizational, interpersonal and multi-tasking skills
- Result focused, customer centric and self motivated individual.
- Ability to act independently, decisively and quickly under pressure

If you possess these skills and qualifications, we invite you to submit your resume in confidence quoting competition # 15B – 495 to:
