

POSITION: UTILITY OPERATOR LEVEL 3
LOCATION: LANGFORD, BC

Corix Utilities develops customized water, wastewater and energy systems and provides field metering services for clients across North America. Our clients include municipalities, resort properties, gas, water and electric utilities, developers and institutions.

If you're someone who is able to navigate through any challenge and are looking for a long term career with a chance to have fun at work, you will fit right in. Corix Utilities has an immediate career opportunity for a Level III Wastewater Treatment Plant Operator in the Victoria area who will organize and supervise the work of employees engaged in the operation of the Dockside Green wastewater treatment plant, and system maintenance. This position offers a competitive salary and comprehensive benefits package which includes, health, dental and vision care.

PRIMARY DUTIES

Duties may include, but are not limited to, the following:

- Operate and maintain a level 4 Wastewater Treatment Plant.
- Evaluate operations and activities; recommend improvements and modifications; prepare various reports on operation activities.
- Prepare annual operating budget and assist in controlling expenditures.
- Participate in the coordination of staff training.
- Answer questions and provide information to the client; investigate complaints and recommend corrective action as necessary to resolve complaints.
- Participate in the full range of wastewater treatment operations, maintenance, and repair duties including performing the most difficult duties assigned to the work.
- Maintain time, material and equipment use records; requisition supplies and materials. Prepare wastewater discharge reports and other monitoring requirements set forth by the permit approval. Perform related duties as assigned.
- Meets the physical requirements necessary to safely and effectively perform required duties.

ESSENTIAL FUNCTIONS

- Knowledge of modern water and wastewater treatment principles, practices, methods and procedures.
- Knowledge of materials and equipment used in a full range of water and wastewater treatment operations, maintenance and repair activities.
- Knowledge of methods and precautions in storing and handling a variety of chemicals.
- Knowledge of functions and purposes of wastewater treatment systems. Principles of personnel supervision, training and evaluation. Safe work practices.
- Ability to operate and maintain state of the art membrane wastewater treatment plant equipment. Perform and interpret standardized process control tests and adjust plant equipment and process appropriately.
- Maintain records and prepare routine reports as required by BC Ministry of Environment.
- Establish and maintain cooperative working relationships with those contacted in the course of work. Communicate clearly and concisely, both orally and in writing.
- Proven leadership abilities.

WORKING CONDITIONS

Work in wastewater collection system and wastewater treatment plant environments; some exposure to water, chemicals, hazardous materials, and noise; heavy lifting/moving, standing, climbing. May work at heights and in confined spaces.
