

CORIX[®]

SafetyPro™

Making safety our number one priority

At CORIX Utilities, safety is critical in everything we do. That's why we have developed SafetyPro™, our comprehensive safety program. Safety is at the heart of our business and is reflected in the decisions and values at all levels of CORIX Utilities.

Corporate safety commitment

- Safety is critical for our customers, employees and the communities we serve
- There is no more important objective - we will NEVER put anything before safety
- Our commitment to safety begins at the corporate level and its effects resonate at the project level

Accessible via FieldPro™

- Unique, web-based safety training and support program - accessible through PerformancePro™
- Support materials and updated information located on our server
- Online mandatory safety meeting schedules and a log for recording safety meeting attendance
- Project manager training tools and tips of effective safety training and presentation skills
- Safety materials available online

Management

- Conduct safety audits to assure that project managers are held accountable for the safety and safe practice habits of their field employees
- Hold field employees accountable for their own safety knowledge and practices
- Record mandatory safety meeting attendance

Knowledge and experience

- Bring years of safety experience in the utility business and unmatched insight
- Understand the risks and constantly develop and learn safe work practices
- Emphasize safety and provide beacon for training and focus
- Hire knowledgeable, well-trained project managers who put safety first

Building a World of Sustainable Communities

Canada 1.866.575.3330

United States 1.877.678.3842

Performance measurement and quality audits

- Exclusive performance measurement tools available to both management and the customer
- Customer satisfaction surveys measure performance from the customer's perspective
- Comprehensive, on-site external audits measure project performance against contractual requirements
- Follow-up on recommendations and action

Reinforcement

- Constantly reinforce safety from the corporate level to each individual field employee
- Select daily safety topics and conduct meetings to make safety the first thing on the minds of field employees
- Provide safety posters and field tools to each project site for display and discussion
- Send safety bulletins to project managers to reinforce safety subjects

Training

- Implement formal, initial and ongoing employee safety training to ensure a constant focus on safety and risk avoidance
- Train employees to identify risk and provide them with the tools and knowledge necessary to make the right decisions
- Provide access to a library of safety training materials, including CBT, video and written material to all project managers to ensure use of the best possible training support and tools

Reward

- CORIX Utilities understands that making safety a priority requires vigilance and dedication
- Our employees are rewarded and recognized for improved safety records
- We celebrate and reward success by sharing knowledge about what works and show appreciation of employee dedication
