## BUILDER APPLICATION FOR WATER, WASTEWATER, STORMWATER SERVICE AND SOLID WASTE COLLECTION

### Scope

The terms and conditions as set out in the Tariff for **Water Service** at Harmony, Alberta by HAWSCO as approved by the Alberta Utility Commission, shall apply to all customers supplied with service by above named Utility. The terms and conditions as set out in the current Rates and Rules for **Wastewater, Stormwater Management, and Solid Waste Collection Service** at Harmony, Alberta by HAWSCO shall apply to all customers supplied with service by the above named Utility.

### Customer Water Service Connection Requirements

**Service Pipes:** The customer shall be responsible at its cost to install water service piping on its property, and from the property line of the lot to the premises. The service piping and connection materials installed by the customer shall be rated by the manufacturer to sustain a minimum working pressure of 160 psi (1,100 kilo pascals) and all work shall meet requirements of the AB Building Code and AB Plumbing Code. No service pipe or fittings shall be covered until they have been inspected and approved by the Utility.

**Shut-off Valve/Stop Cock:** At the point of entry of the water service connection inside the premises, the customer is required to provide and install at its cost a shut-off valve (stop cock) to be located at a point prior to the pressure reducing/regulating valve and water meter.

**Water Meter:** The customer is required to contact the Utility to supply a new Sensus IPERL 3/4" (or larger if required by the Utility) (cubic meter) water meter complete with a remote readout. The water meter inspection can be scheduled by calling 403-273-8676. The meter must be installed horizontally, just after the Pressure Reducing Valve. All water supplied by the Utility to the customer must pass through the meter prior to its use by the customer. The remote readout is to be located on an outside wall of the customer's building which is readily accessible for readings by the Utility. Upon installation of the water meter system by the customer, the plumbing and installation of the meter will be inspected and if approved, sealed by the Utility. Upon sealing of the water meter system by the Utility, the meter and remote readout becomes the property of the Utility and shall not be tampered with or bypassed by the customer. The customer shall permit the Utility access into the customer's premises from time-to-time, to read, inspect, repair or replace the water meter assembly as may be required by the Utility.

**Pressure Reducing/Regulating Valve:** The Utility maintains and operates mainline pressure reducing systems to provide its customers with acceptable water pressures. Although these mainline pressure reducing stations are well maintained, they are mechanical and thus subject to possible and unavoidable malfunction. Therefore, the customer is required to provide and install at its cost a pressure reducing/regulating valve on the water service inside the building, just after the shut-off valve and just before the water meter assembly. HAWSCO is not liable for any damages arising from excessive water pressures.

**Check Valve/Backflow Preventer:** The customer is required to provide and install at its cost a check valve/backflow preventer just past the water meter assembly.

**Service Pipes:** The customer shall be responsible at its cost to install wastewater service piping on its property, and from the property line of the lot to the premises. The service piping and connection materials installed by the customer shall be rated by the manufacturer for wastewater service and all work shall meet requirements of the Alberta Building Code and Alberta Plumbing Code. No service pipe or fittings shall be covered until they have been inspected and approved by the Utility.

**Backflow Valve:** The customer is required to provide and install at its cost a backflow valve prior to leaving the house. The customer shall maintain the backflow valve in proper working condition at all times. HAWSCO is not liable for any damages resulting from the backflow of wastewater or other effluent into a customer's premises.

**Stormwater Management:** The Utility does not charge application fees for the management of the Storm Water system. Management fees will be billed on a monthly basis.

**Solid Waste Collection:** The terms and conditions as set out in the current Solid Waste and Recycling Management Agreement for Harmony, shall apply to all customers supplied with service by the above named Utility.

### Curb Stop

No person who is not an authorized agent or employee of the Utility shall turn on or off the Utility's curb stop to start or stop water supply.

### Application Fees

Application charges shall be paid as follows on all New Applications. All fees are based on 3/4" residential service. Contact Corix Customer Care to determine costs for larger service connections and commercial connections.

Water and Wastewater Connection Fee	\$ 175.00	<i>Administration and account setup, meter inspection, remote reader, turn on waterservice.</i>
Solid Waste Collection Bins (3)	\$ 300.00	
<b>TOTAL FEES AND SUPPLIES</b>	<b>\$ 475.00</b>	

Upon payment of fees outlined above and supply and inspection of the water meter from Utility, the Customer shall be classified as 'in-service' and shall be invoiced for service accordingly. Submit completed form with payment to Corix Utilities Customer Care. If you have questions about the application process please contact Corix at 1-877-577-2112. After you have completed this application process (including submitting forms and paying fees) you are required to contact Corix's Calgary office at 403-273-8676 to:

- Schedule inspection of connection to the curb stop / stub-out. Minimum 2 day notice is required for inspection.
- Schedule inspection of water meter. Following approval of meter installation water will be turned on to the residence. Minimum 2 day notice is required for inspection.
- Schedule an inspection of the connection to the sewer main / stub-out. Minimum 2 day notice is required for inspection and it must be completed at the same time as water service connection inspection.

Note: It is Builder's responsibility to ensure the inspections are done. If homes are possessed without these inspections carried out, Builders will be responsible for any costs associated with necessary repairs or modifications to the systems.
