

SECTION C – RATE SCHEDULES

RESIDENTIAL SERVICE
SCHEDULES 1101, 1121 – RESIDENTIAL SERVICE
[SCHEDULE 1111 NO LONGER IN USE]

Availability: For residential service. Service is normally single phase, 60 hertz at the Secondary Voltage available. In Corix's discretion, service may be three phase 120/208 or 240 volts.

Rate:

1. Rate Schedule 1101 – Residential Service

BASIC CHARGE: 21.17 ¢ per day

plus

ENERGY CHARGE:

Step 1 - First 675 kWh per month @ 9.75 ¢ per kWh

Step 2 - Additional kWh per month @ 14.08 ¢ per kWh

Note: For billing purposes, Step 1 is pro-rated on a daily basis.

MINIMUM CHARGE: The Basic Charge

2. Rate Schedule 1121 – Multiple Residential Service

BASIC CHARGE: 21.17 ¢ per dwelling per day

Plus

ENERGY CHARGE: per dwelling

Step 1 - First 675 kWh per month @ 9.75 ¢ per kWh

Step 2 - Additional kWh per month @ 14.08 ¢ per kWh

Note: For billing purposes, Step 1 is pro-rated on a daily basis.

MINIMUM CHARGE: The Basic Charge per dwelling

Special Conditions:

1. The maximum capacity of all heating elements energized at any one time in all water heaters served at the premises served under these rate schedules must not exceed the greater of 1,500 watts and 45 watts per litre

Issued by: Errol South
Director, Regulatory Affairs
Corix Multi-Utility Services Inc.

Order No: G-87-08; G-68-05; C-13-05; G-91-23/G-154-23

Effective: April 1, 2023

Commission Secretary:

(200 watts per imperial gallon) of tank capacity, except with Corix's advance written permission.

2. Rate schedule 1121 applies if the premises contain more than two dwellings.

Deferral Account
Rate Rider: A charge equal to -1.0% of all amounts otherwise payable under the applicable rate schedule, before taxes and levies.

Rate Changes: Effective April 1, 2023, the Rates and Minimum Charges under these schedules include a rate increase of 1.17%.

GENERAL SERVICE
SCHEDULES 1500, 1501, 1510, 1511 – MEDIUM GENERAL SERVICE
(35 kW or greater and less than 150 kW)
[FORMALLY SCHEDULES 1200, 1201, 1210, 1211]

Availability: For Customers who qualify for General Service and whose Billing Demand is equal to or greater than 35kW but less than 150 kW, and whose energy consumption in any 12- month period is equal to or less than 550,000 kWh. Supply is 60 hertz, single or three phase at Secondary or Primary Voltage. Corix reserves the right to determine the potential of the Service Connection.

Rate:

BASIC CHARGE:	27.08¢ per day
plus	
DEMAND CHARGE:	\$5.48 per kW of Billing Demand
plus	
ENERGY CHARGE:	9.81 ¢ per kWh

Discounts:

1. A discount of 1½% will be applied to the above charges if a Customer's supply of electricity is metered at a Primary Voltage.
2. A discount of 25 ¢ per billing period per kW of Billing Demand will be applied to the above charges if a Customer supplies Transformation.
3. If a Customer is entitled to both of the above discounts, the discount for metering at a Primary Voltage will be applied first.

Monthly Minimum Charge: 50% of the highest maximum demand charge in any Billing Period wholly within an on-peak period during the immediately preceding 11 Billing Periods. For the purpose of this provision an on-peak period commences on November 1 in any year and terminates on March 31 of the following year.

Rate Schedules:

Schedule 1500: Applies if a Customer's supply of Electricity is metered at a Secondary Voltage and Corix supplies Transformation.

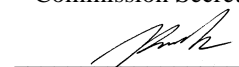

Schedule 1501: Applies if a Customer's supply of Electricity is metered at a Primary Voltage and Corix supplies Transformation.

Schedule 1510: Applies if a Customer's supply of Electricity is metered at a Secondary Voltage and the Customer supplies Transformation.

Schedule 1511: Applies if a Customer's supply of Electricity is metered at a Primary Voltage and the Customer supplies Transformation.

Director, Regulatory Affairs
Corix Multi-Utility Services Inc.

Order No: G-87-08; G-68-05; C-13-05; G-91-23/G-154-23
Effective: April 1, 2023
Commission Secretary:

Definitions:

Billing Demand: The Billing Demand will be the highest kW Demand in the Billing Period.

Billing Period: A month between regular meter readings, provided that in cases where meter readings are not available or are delayed for any reason Corix may vary the number of days in a Billing Period.

Transformation: The Transformation of Primary Voltage to Secondary Voltage, including all associated labour, equipment, and materials.

Special Conditions:

1. Metering

Metering equipment with both demand and energy measurement capability will normally be installed. Until such metering equipment is installed, or if the installed metering equipment does not have demand measurement capability, Billing Demand will be as estimated by Corix.

2. Migration Rules from Medium General Service

Customers taking service under these rate schedules (Medium General Service) will be moved to service under rate schedule 1300 (Small General Service) if Billing Demand in each of the last 12 consecutive Billing Periods was less than 35 kW.

3. Migration Rules to Medium General Service

Customers will be moved to service under these rate schedules (Medium General Service) from rate schedule 1300 (Small General Service) if Billing Demand in half of the last 12 monthly Billing Periods was 35 kW or more, but less than 150 kW, and total Energy consumption in the same period was less than 550,000 kWh.

Deferral Account
Rate Rider:

A charge equal to -1.0% of all amounts otherwise payable under the applicable rate schedule, before taxes and levies.

Rate Changes:

Effective April 1, 2023, the Rates and Minimum Charge under these schedules include a rate increase of 1.17%.

**GENERAL SERVICE
RATE SCHEDULE 1300 – SMALL GENERAL SERVICE
(UNDER 35 kW)**

Availability: For Customers who qualify for General Service and whose demand is, metered or estimated by Corix, as applicable, is less than 35 kW. Supply is 60 hertz, single or three phase at a Secondary Voltage.

Rate: For a period of two months:

BASIC CHARGE: 36.94 ¢ per day

plus

ENERGY CHARGE: 12.70 ¢ per kWh

MINIMUM CHARGE: The Basic Charge

Special Conditions: Special Conditions for Unmetered Service

1. Corix may permit unmetered service under these schedules if it can estimate to its satisfaction the energy used in kilowatt hours over a period of two months based on the connected load and the hours of use.
2. The Customer, if required by Corix, will provide, and maintain such controls, including timing devices, as Corix considers necessary, and facilities satisfactory to Corix for the maintenance of such controls.
3. The hours of use per period will be those specified by the Customer, or those estimated by Corix, whichever is greater.
4. The Customer will supply, install, and maintain all wiring, fixtures, control devices and equipment, including the controls and devices described in Special Condition No. 2, at the expense of the Customer.
5. All wiring, fixtures, control devices and equipment and the method of installing, operating, and maintaining same are subject to the approval of Corix which approval may be withdrawn by Corix at any time, at Corix's sole discretion.
6. The Customer will notify Corix immediately of any proposed or actual change in load, load characteristics, or hours of use.

7. Corix may at any time in its sole discretion, install metering equipment, and thereafter bill the Customer on the appropriate rate schedule as a metered

Migration Rules:

1. Migration rules from Small General Service:

Customer taking service under this rate schedule will be moved to service under rate schedules 1500, 1501, 1510 or 1511 (Medium General Service) if demand in half of the last 12 monthly billing periods was 35 kW or more, but less than 150 kW.

2. Migration rules to Small General Service:

Customers will be moved to service under this rate schedule (Small General Service) from rate schedules 1500, 1501, 1510 or 1511 (Medium General Service) if Billing Demand in each of the last 12 billing periods was less than 35 kW.

Deferral Account
Rate Rider:

A charge equal to -1.0% of all amounts otherwise payable under the applicable rate schedule, before taxes and levies.

Rate Changes:

Effective April 1, 2023, the Rates and Minimum Charge under these schedules include a rate increase of 1.17%.

STREET LIGHTING SERVICE
SCHEDULE 1702 – PUBLIC AREA ORNAMENTAL STREET LIGHTING

Availability: For lighting of public highways, streets and lanes and municipal pathways and for public area seasonal lighting displays, in those cases where the Customer owns, installs, and maintains the standards, fixtures, conductors and controls.

Rate: ENERGY CHARGE:

For each unmetered fixture:	3.82 ¢ per watt of Billing Wattage per month
For each metered fixture:	11.47 ¢ per kWh

Definitions: Billable Wattage is the sum of all wattage, on all fixtures used by the Customer. For fixtures without dimming controls, the watts per fixture will include the wattage of the lamp plus, where applicable, the wattage of the ballast. For fixtures with dimming controls, the watts per fixture will be equal to:

1. The wattage of the lamp plus, where applicable, the wattage of the ballast, multiplied by
2. The ratio of effective fixture wattage after dimming to fixture wattage before dimming.

Special Conditions:

1. Service Connection

Where necessary Corix will provide an overhead or underground Service Connection in accordance with the Terms and Conditions of the Electric Tariff. No Service Connection will be made to add any ornamental street lighting system which does not provide for eight or more street lighting fixtures except that, if the potential is 120/240 volts, then, at Corix's discretion, a Service Connection may be made for a system of less than eight.

Receptacle loads will be permitted for Service under this schedule provided that such receptacles are used predominantly for seasonal lighting displays, meaning that no more than 10% of the usage may be for other purposes.

2. Extension Policy

Corix will construct a distribution extension if required by the applicant in accordance with the Terms and Conditions of the Electric Tariff.

3. Power Factor

All installations of mercury vapour, sodium vapour or fluorescent lamps will be equipped with the necessary auxiliaries to assure that a power factor of not less than 90% lagging will be maintained.

4. Term of Service Agreement

The term of the initial Service Agreement under this schedule will be not more than five years; renewal periods will be for five years.

5. Unmetered Service

- (a) Corix may permit unmetered service under this rate schedule if it can estimate to its satisfaction the Energy used in kilowatt hours over a period of one month based on the connected load and hours of use.
- (b) The Customer will notify Corix immediately of any proposed or actual change in load, or load characteristics, or hours of use.
- (c) Corix, in its discretion, may at any time install metering equipment and thereafter bill the Customer on the Energy consumption registered.

Deferral Account
Rate Rider:

A charge equal to -1.0% of all amounts otherwise payable under the applicable rate schedule, before taxes and levies.

Rate Changes:

Effective April 1, 2023, the Rates under this schedule include a rate increase of 1.17%
